Adventure Kaprun high mountain reservoirs

High up on the trail of the legend! In the midst of the Upper Tauern lies VERBUND's birthplace and one of the most impressive constructions of the post-war period. The Kaprun high mountain reservoirs, including the two reservoirs "Wasserfallboden" and "Mooserboden", at about 2,040 metres above sea level.

Verbund

The two lakes lie in the upper Kaprun valley like two fjords. Nestled between the three-thousand-metre summits of the Alps, on the edge of the Hohe Tauern National Park. A legend was once created here in the post-war years which can still be traced today. Whether in the Electricity Adventure World, which presents the history and challenges of the structure as well as the variety of the Hohe Tauern National Park in two languages. Or the overpowering technical achievement that was realised here amidst the Alps.

The power of water and the possibilities for generating electricity from hydropower are explained here up close. Especially for families, the adventure play stations on the "Electricity Trail" explain the topic of hydropower and energy generation in a playful way. VERBUND opens its doors and provides an insight into the inner workings of the Moosersperre dam and modern electricity generation on guided tours of its facilities.
